

ZOTEROMCPE2EOPENING4D8B2E
ZOTEROMCPE2ESEARCH7F3A9C

This document is an original, copyright-free fixture for the zotero-mcp public end-to-end test. Its only purpose is to provide deterministic text for Zotero indexing, search, attachment resolution, and bounded full-text retrieval.

The opening section deliberately contains enough plain text to cross the first chunk boundary while keeping both opening markers inside the initial response.

ZOTEROMCPE2ECONTINUATION9C1F6A

Following the returned next_offset must reach this continuation section. The remaining sentences keep the indexed content longer than two small chunks so the first response is reliably truncated. Every phrase in this file was written for this repository; it contains no copied article, private library content, personal information, or credential.

Public fixture verification is complete only when the configured Zotero group contains one report item with this PDF as its sole stored child attachment.
